

Highbay Microwave Motion Sensor

Product Features

- 2 or 3 Step Dimming Function (ON-OFF, or ON-DIM-OFF)
- Compatible with S-Tech LED high bays
- Some wiring changes required by installer, supplied with junction box and required connections
- Requires optional remote control for set-up of sensor functions
- Ø73 x 62mm
- IP65 Housing

Specification Overview

Model	Power Requirement	Colour	Dimensions
FLA-SHV18S-MMSR	108~305VAC	Black	Ø30x111mm
FLA-MMS-REMOTE	2 x AAA Batteries	White	55 x 174 x 22mm

A large warehouse aisle with high shelves filled with boxes. A black, cylindrical sensor or camera module is overlaid in the foreground, pointing towards the aisle. A black banner with the text "Product Specification" is in the top left corner.

Highbay Microwave Motion Sensor

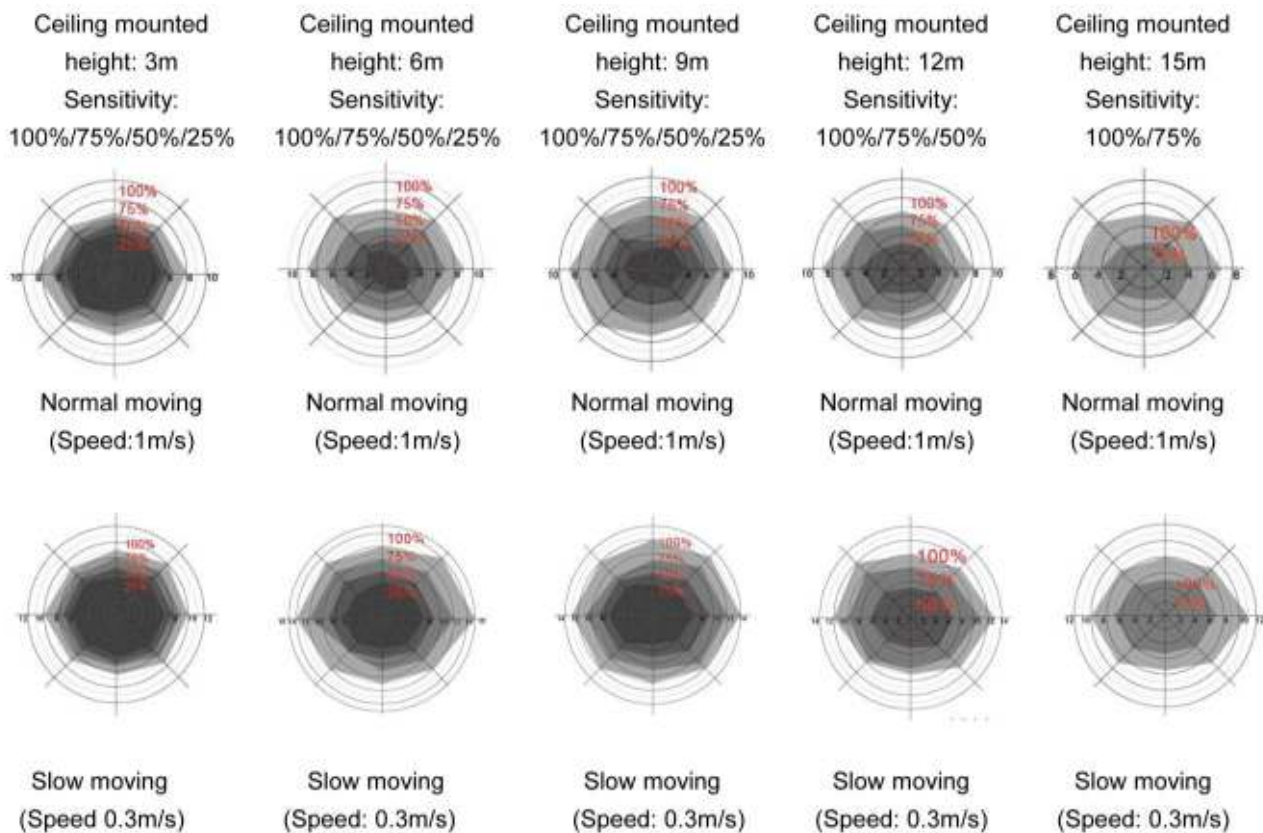

Specification	
Model	FLA-SHV18S-MMSR
Hardware Requirement	S-Tech LED Highbay with a 0-10V Driver
Input Signal	DALI (IEC 62386-101/102/103/207)
DALI Input Current	< 2mA
Input Voltage	108-305VAC
Standby Power	<1w
Hold Time	5s, 30s, 1min, 3min, 5min, 10min, 20min, 30min
Stand-By DIM Level	10%, 20%, 30%, 50%
Stand-by Period	0s, 10s, 1min, 3min, 5min, 10min, 30min, +∞
Detection Area	25%, 50%, 75%, 100%
Daylight Sensor	5lux, 15lux, 30lux, 50lux, 100lux, 150lux, Disable (ambient light detection) – No Daylight Harvesting Mode
Mounting Height	Max. 15m
Detection Angle	360° (ceiling mount)
Product Dimension	Ø30 x 111mm
Protection Rating	IP65
Warranty	5 Years

Highbay Microwave Motion Sensor

Sensitivity Pattern

*Only 100%/75%/50% detection sensitivity is workable when installed at 10m & 15m mounting height. 25% sensitivity is not able to detect motion signal.

Product Specification

Highbay Microwave Motion Sensor

Function

1) 2-Step ON/OFF Function – Stand-by set to “0s”

- ① With sufficient ambient light, the light will not be switched on even if with motion signal.

- ② With insufficient ambient light, the sensor switches on the light when motion is detected.

- ③ After elapse of hold time, the sensor switches off the light when no motion is detected.

2) 2-Step ON/DIM Function – Stand-by set to “∞”

- ① If there is no motion detected, the light will be remained at a low light level all the time.

- ② When motion is detected, the sensor will switch on the light to 100% brightness

- ③ After elapse of hold time, the sensor dims the light at the present low light level if no motion is detected.

3) 3-Step ON/DIM/OFF Function – Stand-by set to “10s/1m/3m/5m/10m/30m”

- ① With sufficient ambient light, the light will not be switched on even if with motion signal.

- ② With insufficient ambient light, the sensor switches on the light when motion is detected.

- ③ After elapse of hold time, the sensor dims the light at a low light level if no new motion is detected.

- ④ After elapse of standby period, the sensor switches off the light if no motion is detected in the detection zone.
