

Please read these instructions carefully in full prior to carrying out the installation.

### IMPORTANT SAFETY ISSUES

- This product must be installed by a qualified electrician according to AS/NZS 3000.
- Ensure that the AC power is disconnected at the switchboard and test to ensure that there is no power on the circuit prior to starting installation.
- This product is rated to IP20 (front) and is not suitable for damp environments.
- Modification of this product will void any warranty.
- When cleaning or replacing the light, please ensure the power is off and the light is completely cooled down. Cleaning can be done using a soft cloth and PH neutral detergent.

### INSTALLATION INSTRUCTIONS

Step 1: Turn off the power supply, remove the LED light head from the base by pressing the buttons on the endcaps as shown in figure 3 & 4.

Step 2: Install the base onto the ceiling and terminate the power cable into the terminal block.

Step 3: Fit the LED light head back onto the base ensuring that none of the power cables are caught between the base and the LED light head.

Step 4: Adjust the LED Power and the Colour Temperature using the switches on the side of the base. The default setting is 40w and 4000K.  
**NOTE: Please do not adjust the Power of Colour Temperature when the light is ON as it will damage the driver**

Step 5: Turn on the power supply and ensure the luminaire is working.
