

User Manual

All In One Solar Street Light

Main Parts

Electrical Characteristics:

Solar panel	Monocrystalline silicon
Rechargeable Battery	Li-ion Battery
Material	Aluminum alloy + PC

LED Screen

Install Caution

Keep the solar panel towards the sun to ensure that it can be charged well, and in this way the solar panel can charge built-in Li-ion battery effectively.

ALL IN ONE
SOLAR INTELLIGENT
STREET LIGHT

How to install the device?

When the lamp is power on, the screen can be waked up by PIR trigger or button or remote controller. If there is no operation for 30 seconds, the screen will automatically turn off.
If need any button or remote controller operation, need to wake up the screen first.

Special Note:

1. Do not install the lamp against the sun, under the shadow or between two buildings which height above the lamp. Otherwise, it will lead to absorption of sunlight and insufficient brightness and time;
2. Do not use the lamp in the environment temperature above 45℃ or below 0℃, otherwise will cause the rapid attenuation of the battery and affect the battery life, even damage;
3. Do not use the non-standard installation accessories to install the lamp, otherwise any accident is caused will be borne by the installer;
- 4 Choose the suitable lighting mode according to local sunshine. Do not use the M2 and M3 in the areas where without enough sunlight, otherwise will lead to insufficient brightness and time;
5. Please charge the product every 3 months to ensure the activity of the lithium battery;
6. If you storage the product over one year, please do fully charge and discharge inspection and make sure the battery is in good condition, Otherwise, it is forbidden to use!

Warning:

1. Keep the device away from fire and oil to avoid any fire or explosion;
2. No one except professional technicians should attempt to disassemble the light in order to avoid damaging the light;
3. It is strictly forbidden to disassemble the battery for personal use;
4. If the lamp doesn't get charge for 10 days, the battery maybe out of power, you have to charge it under bright sunlight;
5. In order to ensure that the lamp works in an ideal state for a long time, please clean the solar panel regularly according to the local dust conditions, our suggestion is one time at least half a year;
6. long-term static storage the product over one year will cause the inside battery damage or even leakage. If the battery is leaking, it will cause the battery to spontaneously ignite.
