

### Safety Instructions

To ensure correct function and safety, please read and follow all instructions carefully before using the product:

- This product must be installed by a qualified electrician according to AS/NZS 3000.
- Ensure that the AC power is disconnected at the switchboard and test to ensure that there is no power on the circuit prior to starting installation.
- This product is rated to IP54 and is suitable for damp environments.
- Lay out all the components on a smooth surface and make sure there are no components missing before assembling.
- Modification of this product will void any warranty.
- When cleaning or replacing the light, please ensure the power is off and the light is completely cooled down. Cleaning can be done using a soft cloth and PH neutral detergent.

### Installation Procedure

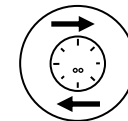

#### Step 1

Take the light and accessory pack from the box

#### Step 2

From the back of the light, remove the mounting plate (centre section) by twisting it clockwise

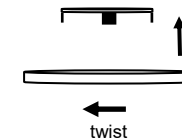

#### Step 3

Install the mounting plate to the ceiling and ensure that the plate is secured correctly with at least 2 screws fixed to the ceiling joists, or expansion fittings are used. Connect the the AC cables into the terminal block.

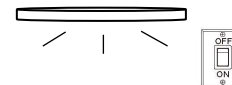

#### Step 4

Select the required colour temperature via the switch on the light head and align the light head onto the mounting plate and twist anti-clockwise to secure the light.

#### Step 5

The light is now installed and you can apply AC power and can switch on the light.
