

Please read these instructions carefully in full prior to carrying out the installation.

IMPORTANT SAFETY ISSUES

- This product must be installed by a qualified electrician according to AS/NZS 3000.
- Ensure that the AC power is disconnected at the switchboard and test to ensure that there is no power on the circuit prior to starting installation.
- This product is rated to IP65 and are suitable for damp environments.
- Modification of this product will void any warranty
- Do not hang the light between the backplate and the light as damage to the connector may occur and void any warranty
- When cleaning or replacing the light, please ensure the power is off and the light is completely cooled down. Cleaning can be done using a soft cloth and PH neutral detergent.

INSTALLATION INSTRUCTIONS

- Disconnect the power at the switchboard
- To retain the IP65 rating, please ensure the cable entry hole is sealed with Neutral Cure Silicone

Step 1

Take out the lamp and accessories.

Step 2

Take out the base from the lamp body.

Step 3

Fix the base on the wall and make the wires through the hole of the base.

Step 4

Set the wires respectively.

Step 5

Get the lamp fixture back to the base and fix it well.

Step 6

The beam angle can be adjusted by rotating the plate.
