Canopy Light Installation Instructions
Model: SCL-xxxW-VS series LED Canopy Lights

Please read these instructions carefully in full prior to carrying out the installation.

<u>**IMPORTANT SAFETY ISSUES**</u>

- This product must be installed by a qualified electrician according to AS/NZS 3000.
- Ensure that the AC power is disconnected at the switchboard and test to ensure that there is no power on the circuit prior to starting installation.
- This product is rated to IP65 and is suitable for damp environments.
- Modification of this product will void any warranty.
- When cleaning or replacing the light, please ensure the power is off and the light is completely cooled down. Cleaning can be done using a soft cloth and PH neutral detergent.

<u>**INSTALLATION INSTRUCTIONS**</u>

- Disconnect the power at the switchboard
- Ensure the operation voltage is compatible with the circuit you are connecting the light too
- Ensure that the fixing location for the light can hold the weight of the lighting fixture
- Measure, mark and drill the mounting holes for the light on the ceiling
- Terminate the power into the junction box and ensure a complete weatherproof seal
- Check all connections are correct
- Mount the light onto the ceiling using all four (4) fixing points
- For a weatherproof seal, use a bead of neutral cure silicone to seal between the light and the ceiling for added protection
- Turn power back on at the switchboard and test the lights operation.
